DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Rumsey et al 4,952,434. The reference discloses a joining member 14 having a groove on one surface 42, a ridge on an opposite surface 44 (one side of the C-shaped member 44 may be considered a ridge) and a pair of opposed surfaces 46,48 with notches therein. The opposed surfaces 46, 48 can be considered "sides" surfaces since "side" is a relative term depending on the angle from which one views the member 14; see Figure 3. The statements of intended use in the claim, such as "for mechanically joining", "adapted for bonding ...", "allowing the joining member to be ...", etc. do not add any structural features to the claimed article.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ellingson 4,766,020. The reference discloses a joining member 10 comprising a groove 18 on one surface, a ridge 15 on an opposite surface, and a pair of opposed surfaces having notches 23, 27 therein; see Figure 5. The statements of intended use in the claim, such as "for mechanically joining", "adapted for bonding ...", "allowing the joining member to be ...", etc. do not add any structural features to the claimed article.

Allowable Subject Matter

3. Claims 14-17 are allowed.
